## Experience

**rtCamp**                                                                                           **15 July 2024 - Present**

Software Engineer                                                                                                    Pune

🔗 https://rtcamp.com/

- Worked with the rtCamp team to build a powerful internal ERP system, focusing on the design and features.
- Built clean, easy-to-use, and reliable user interfaces using React for a smooth experience on different devices.
- Handled complex app data using Redux to manage and organize large and constantly changing information.
- Used React Router to create smooth and fast navigation between different pages in the ERP system.
- Connected the frontend with the backend using REST APIs to show up-to-date data and improve how fast and well the app works.

## Projects

**Evergreen: Nature at Doorstep**

🔗 https://play.google.com/store/apps/details?id=com.evergreenplantifyworld.green&pli=1

Developed an e-commerce platform where users can browse and purchase plants. Additionally, built an admin dashboard that allows sellers to add new plants, manage inventory, and track orders within specific localities.

NodeJS, Express, MongoDB, React Native

**Nekoflix**

🔗 https://nekoflix-landing-page.vercel.app/

An open-source app that offers a seamless streaming and manga reading experience, allowing you to indulge in your favorite shows and explore captivating manga series without interruptions

RestAPI, React Native

**Melody**

🔗 https://melody-landing-page-one.vercel.app/

Developed with React Native and powered by JioSavan's Unofficial API, Melody offers a seamless and exhilarating music experience right at your fingertips.

RestAPI, React Native

---

## Skills

**MongoDB**

Experienced in MongoDB for scalable data storage solutions.

**ExpressJS**

Proficient in Express.js for efficient web application development

**React**

Proficient in React for dynamic web application development.

**NodeJS**

Mastered Node.js for scalable backend development

**Google Cloud Platform (GCP)**

Skilled in Google Cloud for secure cloud-based solutions.

**React Native**

For creating cross-platform application
